PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience designing and shipping production software across Node.js, React, and cloud platforms (GCP, AWS, Azure). Architected core systems for two products now used at scale: an AI chatbot platform serving 16.1K+ users across 11.6K+ organizations, and a power bank sharing network spanning 80+ cities and 600+ stations with 260K+ users. Strong foundation in RAG/vector search, prompt engineering, payment integrations, and building secure, multi-tenant applications.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, Node.js, Nest.js, Express.js, React.js, Next.js, React Native, Redux, MobX

Backend & APIs: RESTful API Design, OAuth 2.0, Role-Based Access Control (RBAC), Webhooks

Cloud & Infrastructure: AWS, GCP, Azure, Google CASA Tier 2 Compliance

Data & AI: MongoDB, Mongoose, Vector Search, Retrieval-Augmented Generation (RAG), LangChain, Prompt Engineering

Integrations: Stripe, PayPal, LemonSqueezy, MQTT, Electron.js

Tools & Other: Git, Postman, WordPress, HTML, CSS, Tailwind CSS, Bootstrap, Material UI

PROFESSIONAL EXPERIENCE

Full Stack Developer *Jun 2023 - Present*

Hanabi Technologies

- Architected the system design for Hana, a conversational AI chatbot platform now used by 11.6K+ organizations and 16.1K+ users.
- Architected the system design for Juice, a power bank sharing platform that scaled to 80+ cities and 600+ stations, serving 260K+ users and 400K+ hours rented.
- Integrated 3 payment gateways (Stripe, LemonSqueezy, PayPal) to support multiple checkout and subscription billing flows.
- Implemented Google OAuth sign-up and role-based access control (RBAC) to secure multi-tenant application access.
- Built a Retrieval-Augmented Generation (RAG) pipeline using MongoDB vector search, plus CRM marketing pipelines, image intelligence features, and reporting groups.
- Led the technical workstream to achieve Google CASA Tier 2 security certification for the chatbot product.
- Developed an offline desktop application for label printing using Electron.js, enabling functionality without internet connectivity.
- Implemented MQTT-based communication to enable real-time data exchange with IoT devices.
- Replaced an iterative, multi-pass retrieval process with a single direct-search approach for a legal citations use case, cutting retrieval time by ~50%.

Software Engineer - Frontend *Dec 2022 - Apr 2023*

Youth India e-School

- Built assessment management, learning management, and reporting systems, along with the company's responsive marketing website.
- Designed UI/UX for an HRMS client dashboard in Figma and developed a cross-platform (Android and Web) dashboard using React Native.

EDUCATION

Bachelor of Engineering (B.E.), Mechanical Engineering *Jun 2015 - Apr 2019*

K.S.R Institute for Engineering and Technology
